EXCELLENCE IN DESIGN

AMERICAN BUILDINGS' EXCELLENCE IN DESIGN BUILDING OF THE YEAR: Baptist Health Iceplex

2025

2025 EXCELLENCE IN DESIGN

THESE **AWARD-WINNING PROJECTS**
DEMONSTRATE THE **CREATIVITY** AND
CRAFTSMANSHIP OF OUR BUILDERS.

American Buildings is proud to announce the winning projects in our 2025 Excellence in Design competition. The powerful partnerships we've forged with our Builders helped bring these award-winning projects to life in categories ranging from recreation to retail, and aviation to manufacturing.

Through this competition, we offer Builders an outlet to exhibit their creativity and workmanship and illustrate how metal building systems meet the diverse needs of their customers – regardless of a project's scale or intricacy. In collaboration with Authorized Builders, American transforms ideas into reality while continuously expanding the possibilities of the metal buildings industry.

INNOVATION.
TECHNOLOGY.
SOLUTIONS.

GOLD

The Baptist Health IcePlex is a versatile, modern facility designed for the Florida Panthers hockey team and serves as a recreational resource for its local community. This state-of-the-art complex features two regulation-sized indoor ice rinks and a dedicated training and practice center for the Panthers. Beyond its athletic trappings, the IcePlex serves as a vibrant community hub, with dedicated areas designed for public use. Tenant zones, intended for medical offices, dining, and retail outlets, create a lively atmosphere for visitors. To enhance and maximize functional space, the interior's design incorporates several mezzanines. The structure's exterior features American Buildings' Loc Seam 360 roof system in galvalume and a modern, inviting façade created with a clever fusion of American's R-panels in pearl gray and Insulated Metal Panels in slate gray. The Baptist Health IcePlex successfully unites sports, wellness, and community services under one roof.

SILVER

The National Advanced Air Mobility Center of Excellence is a facility dedicated to studying air mobility and unmanned aircraft systems. It boasts 30,000 sf of advanced collaboration space and a 25,000 sf hangar. American's SS360 standing seam roof system, paired with Reverse R-Panel walls in a stylish charcoal color, lend the exterior a sleek modern appearance while below eave canopies, rake extensions, and parapet walls further enhance the design. The hangar building's endwalls and the main facility's striking corner entrance — framed by expansive glass curtain walls that invite natural light into the lobby — are clad in a complementary royal blue, providing visual interest and depth. A captivating and unique suspended aircraft installation welcomes visitors as they enter the lobby, completing the impressive facility's overall effect.

BRONZE

The Pod 1A Education Center is located on the Rock Lititz campus—a vibrant community that fosters creativity in the live event industry. This 29,000 sf facility is an addition to an existing American building, separated by a masonry firewall. It houses a rehearsal studio and tenants focused on training and education. Multiple mezzanines provide three levels of usable space. Designed to accommodate stage lighting equipment, the building includes rigging grids in the ceiling capable of supporting heavy hoists and chain loads. Special design considerations were taken to control sound, noise, and vibrations. Pod 1A's exterior is bold and visually striking. Its walls are clad with American's Reverse R-Panel in a crisp custom black and topped with the SS360 trapezoidal standing seam roof system in galvalume. Its entrance dazzles with expansive glass curtain walls, rustic wood panel accents, and vibrant bright yellow trim, creating a welcoming and dynamic atmosphere for all who enter.
